## WORK EXPERIENCE

### **MEST Africa, Accra — Entrepreneur-In-Training (E.I.T)**

September 2022 - Present

Working on building a globally successful software company.

### **Conflux Network Africa, Nairobi — Technical Lead and Ambassador**

June 2021 - December 2021

My work involved growing the developer community building on the Conflux Network by reaching out to student developer clubs and other outreach programs such as token airdrops. I also led efforts to build partnerships between Conflux Network Africa and other partner organizations. In addition, I also served as a technical point of contact for the Conflux Network community.

### **DECUS Network GmbH, Nairobi — Research and Operations Assistant**

July 2021 - October 2021

I supported the CEO and CTO to conduct their duties. I participated in different projects by leveraging my skills. I built a web scraper bot in python that aggregated relevant news information to enhance lead generation. I also participated in UI/UX design where I developed lo-fi and hi-fi wireframes for the new company website. Moreover, I developed a brand style template to assist in UI/UX implementation. Lastly, I provided business development services whereby I conducted research and advised on various growth and marketing strategies for the pivoting of the company.

### **University of Nairobi, Nairobi — BSc. Physics**

May 2013 - September 2017

Specialized in Digital Electronics and Microprocessor Instrumentation
